"Unseen and Uncounted: Bureaucracy, Identity, and the Birth of Panethnic Politics." (based on award-winning [dissertation](#))

Interviewed by [Scope Conditions Podcast](#)

Winner of the 2022 Best Dissertation Award, Urban and Local Politics, APSA

Winner of the 2020 Best Paper Award, Asian Pacific American Politics, WPSA

Unseen and Uncounted: Bureaucracy, Identity, and the Birth of Panethnic Politics develops a new theory of racial group formation by examining how non-white immigrant communities responded to their exclusion from federal classifications—especially during the War on Poverty. As social policies were implemented through administrative categories that failed to recognize certain immigrant-origin communities—particularly those from Asia and Latin America—these groups found themselves rendered invisible in official records and ineligible for state resources. In response, ethnic elites within these communities engaged in political innovation: they introduced new panethnic labels, built coalitions across ethnic lines, and founded civic organizations to claim recognition

and resources. These efforts were rooted in everyday encounters with street-level bureaucrats, where eligibility and access were mediated by how individuals were racially classified. Over time, these localized struggles scaled upward, influencing the design of federal classification schemes and reshaping the language of racial politics. Drawing on archival research, a dataset of over 800 ethnic organizations, and computational analysis of 78,000 ethnic newspaper articles, the book brings together multiple sources of evidence to trace the development of panethnic politics from the ground up. It uses comparative methods—including U.S.–Canada, Asian–Latino, and Asian–Black comparisons—to show how the politics of classification can drive new forms of collective identity and ultimately reshape how the state sees and governs racial difference.
